I am against bill number HR4026, for many reasons. I know of many suations in which the traffic and weather channels have prevented many accidents. I am a long haul trucker and these many stations have saved me time and money on numoberous occations. I feel that if these stations are removed from the airwave that many truckers will be put into many needless saftey hazards situations. We urge you to vote against Hr4026. Thank you for you time.
